

## **GREENCELLS GROUP APPOINTS FABIAN HERR AS NEW CEO**

Saarbrücken, 3 March 2025 – The Greencells Group is pleased to announce the appointment of Fabian Herr as its new Chief Executive Officer (CEO).

Mr Herr takes up the position with effect from 1 March 2025 and brings over 15 years of relevant experience in the planning, realisation and operation of international solar projects.

Before joining Greencells, he was most recently Chief Operating Officer (COO) at Iqony Sustainable Energy Solutions (SENS), where he played a key role in scaling the company and providing turnkey EPC solutions in various regions of the world. His in-depth expertise in the renewable energy sector and his focus on operational excellence have helped to embed long-term improvements in processes and structures.

‘I am very excited about the new challenge and look forward to continuing the Greencells Group success story together with this outstanding team. My goal is to play a decisive role in shaping the strategic development of the company and further strengthening its market position by consistently implementing the corporate strategy and optimising processes along the entire value chain,’ says Fabian Herr about his new role.

With Fabian Herr as the new CEO, the Greencells Group is ideally positioned to further strengthen its innovative strength and outstanding role in the field of EPC turnkey solutions and to set the company on a successful and sustainable growth path.

#### **ABOUT GREENCELLS GROUP:**

Greencells Group is a global project developer and provider of EPC and O&M services for large-scale solar power plants. With a track record of over 3.2 GWp of installed capacity, the company is an experienced partner for the optimal planning, financing, implementation, and operation of solar parks. Greencells Group companies employ around 120 staff and several hundred skilled workers on their active construction sites. As one of the largest European providers of solar power plants, Greencells Group has already been successfully involved in the construction or planning of recently 179 photovoltaic plants in 21 countries.
